Summary Statement

Senior Software Engineer with 6+ years of experience in Swift iOS Dart Flutter and Android Kotlin development, adeptly creating end-to-end large-scale applications. Proficient in asynchronous network programming and software architecture design. Seeking to apply my technical prowess and leadership acumen to drive innovation and elevate organizational outcomes.

Work Experience

Senior iOS Developer

App in Snap, Pakistan

May 2023 - Present

- I am working on the JS Zindigi App, which improves lifestyle with features like online spending, trading access, and payments.
- I have developed and continue to maintain the app for iOS platforms, overseeing bug and error reporting processes to ensure a streamlined user experience.

Senior iOS & Flutter Developer

Webotiks, Pakistan

Oct 2020 - Feb 2023

- At Webotiks, I completed several iOS projects using Swift and Flutter, including the Revaki app for local product buying and Revaki Admin in Flutter, providing businesses with access to essential data and support tools.
- I also manage a team of mobile app developers, overseeing tasks, monitoring performance, and ensuring high standards in project completion.

Senior iOS Developer

Catalyst IT Solution, Pakistan

Aug 2018 – Sept 2020

- At Catalyst, I worked on a stock exchange product called iTick, which was initially developed in Objective-C, and provided ongoing support and updates to the existing project.
- I rewrote the entire iTick project from scratch in Swift, improving the overall functionality and performance of the app.

Work Experience

iOS App Development Course

Sir Syed University of Engineering and Technology, Pakistan

Feb 2016 - Sept 2016

Bachelor of Science (BS) in Computer Science

Sir Syed University of Engineering and Technology, Pakistan

2012- 2016
