Summary Statement

Senior Software Engineer with 6+ years of experience in Swift iOS Dart Flutter and Android Kotlin development, adeptly creating end-to-end large-scale applications. Proficient in asynchronous network programming and software architecture design. Seeking to apply my technical prowess and leadership acumen to drive innovation and elevate organizational outcomes.

Work Experience

Sr. iOS Developer

App in Snap, Islamabad Pakistan

May 2023 - Present

- I developed and enhanced the JS Zindigi App for iOS, integrating features like online spending, trading, and payments, ensuring seamless functionality and robust performance.
- Collaborated with UX designers and engineers to align app features with business goals, while optimizing performance and conducting testing.
- Awarded the "Zindigi 2.0 Launch Champion" certificate for key contributions, including improvements to Fuel Pocket and Split Bills features.

Sr. iOS & Flutter Developer

Webotiks, Karachi Pakistan

Oct 2020 - Feb 2023

- Led a team of mobile developers, managing task delegation, performance monitoring, and ensuring high standards in project delivery.
- Contributed to iOS and cross-platform development using Swift and Flutter, successfully executing projects like Revaki, Greeno, and Etimad Online.
- Collaborated with designers and engineers, ensuring alignment with business goals, while maintaining high code quality and resolving technical challenges efficiently.

Sr. iOS Developer

Catalyst IT Solution, Karachi Pakistan

Aug 2018 – Sept 2020

- Led the rewrite of iTick from Objective-C to Swift, enhancing functionality, performance, and user experience while developing new features and providing ongoing support.
- Collaborated with developers and stakeholders to ensure project alignment, addressing technical issues, improving code quality, and delivering high-quality updates.
